Program: AS Science: Engineering Specialization

Catalog Year: 2016-2017

Advisor:

Materials Science & Engineering @ VT

Program purpose: With the tremendous emphasis on technological developments in today's society, great demand exists for engineers to work with developing technologies both at the development state and the application stage. The associate of science degree program with a specialization in engineering is designed for persons who plan to transfer to a four-year college or university to complete a baccalaureate or higher degree program in an engineering discipline such as mechanical, civil, construction, ocean and mining and materials engineering.
